

DEEPER TALKS

SURF SEMINAR SERIES

Monthly science talks providing a platform for researchers to discuss their work, share insights, and foster interdisciplinary connections

Hosted by

THE INSTITUTE
FOR UNDERGROUND SCIENCE
AT SURF

SPEAKER:

DR. JAMES BOWEN

UNIVERSITY OF KANSAS

UPCOMING TALK
DEC 10, 2025 • 9AM MT
VIRTUAL

MEASURING DIJETS FROM ULTRA-PERIPHERAL HEAVY ION COLLISIONS

This talk explores how data from the Compact Muon Solenoid Experiment at the Large Hadron Collider was used to study dijets from photon-nuclear collisions. Dijet measurements help probe the distribution and behavior of gluons within nuclei—key to understanding the quark-gluon plasma and other quantum phenomena. By examining azimuthal correlations in dijet momentum, researchers observed a positive correlation, offering fresh insight into gluon structure.
